

# Smart home solutions

SURVIVE  
THE DAY

# What if you could control... everything?

What if your remote controlled more than just your home theater? What if you could use it to dim the lights, lock the doors, turn up the heat, and arm the alarm? What if you could do all these things from any room in your house—or anywhere in the world?

Imagine living in a home that obeys your every command... where virtually every device can be remotely controlled, and virtually every system can be fully automated.

Introducing Control4, a smart automation

solution for homes and businesses.

Control4® makes it easy for you to intelligently control every aspect of your home—from TVs to thermostats, door locks to drapes—no matter where you are, using one simple-to-use interface. Control4 solutions make your life more comfortable, more efficient, and more secure.

Best of all, Control4 gives you the power to customize your home—and live your life—in ways you've never dreamed. The only question is...

What do you want to control?

---

# The genius of the smart home

---

## The brains

It all starts with a controller, the central hub of every Control4 system. A controller gives you the power to control and automate virtually any home function, including your home theater, music, lighting, temperature, security system, appliances and more.

Sleek designs make them easy to place behind a TV or mount in a rack, and each model allows you to build anything from a basic home theater system to a whole-home automation solution. Additionally, controllers offer features such as media storage, audio streaming and seamless integration of your favorite consumer electronic devices.

Control4® HC-250  
Perfect for control from your TV  
or for one-room systems.

Control4® HC-800  
Blazing fast, powerful, and flexible. The  
cornerstone for every control system.

Even if your home is 100+ years old,  
it can still have a brain! Control4  
solutions work with both standard  
wired and wireless protocols.

Bring control to every corner of the house with MyHome—an app that turns your iPad, iPhone, Android tablet, smartphone or PC into the ultimate remote control.

## The beauty

What makes Control4 so easy to use is our intuitive, elegant user interface, which is virtually the same on every device.

For the family room, you may prefer a remote that gives you total control of the house right from your TV. In the kitchen, you might prefer an elegant in-wall touch screen that makes it easy to monitor the house at all times. Or with the MyHome app, control everything from your iPad, iPhone, Android tablet or PC.

“We used to have a different remote for the TV, the DVR, DVD player, and the receiver. Now one remote controls the entire system, and the whole house!”

—Ellen, FL

# Goodbye cineplex, hello Control4

## Watch

With a minimal investment, you can transform your family room into a state-of-the-art home theater—and have the foundation of what you need to ensure your smart home can keep getting smarter. With one easy-to-use remote, you'll be able to watch TV, access your DVD/movie collection, and enjoy your entire music library. All it takes is one touch to have the shades close, the lights fade, and the receiver kick in at the perfect volume. Your old remote could never do this!

- Automate your home theater experience with one-touch control
- Access your home control system through your TV
- Send HD video to any room in the house

- Watch video from multiple sources, including disc players, hard drives, and portable devices—or browse through them all simultaneously

All you need is one remote: Control4 solutions simplify the control of everyday audio, video and home theater components.

# Your music, your way

## Listen

With unprecedented control over your music, Control4 will change the way you listen to music—forever. The intuitive user interface makes it a breeze to browse through your music collection and play any song you want, at any volume, in any room in the house.

- Hear classical in the den, jazz in the kitchen, and rock in the teen's room—all at the same time
- Play songs from your iPod, radio, XM satellite, internet, or digital music library
- Distribute amplified music to different areas in the house with multi-zone amps
- Send music wirelessly to any room in your house with a speaker point

“We used to listen to the same CDs all the time. But now, with our music library at our fingertips and music in every room, we’ve rediscovered old favorites—and a few new ones!”

—Richard, OR

# Smart lighting is a bright idea

## Lights

Whether you want the perfect ambiance in every room, one-touch control, or just an effortless way to save energy, Control4 has the simple solution: total control over every light in the house—from across the room or across the globe.

- Have the lights in the house turn on automatically to welcome you home
- Use motion sensors to provide hands-free illumination in the dark
- Turn off all the lights with a single touch—except for the kids' nightlight
- Program the lights to shut off automatically when a room is unoccupied
- Combine lighting with curtain control and the whole house looks lived in even when you're away

You can control lighting scenes throughout your home from a central keypad or touch screen—no more dashing through the house to flip switches. You can even have your house lights turn on as you're pulling into the driveway so you never have to enter a dark home again. And don't even think about construction hassles. With Control4, you can turn any standard outlet into two smart outlets, ready to control just about any electrical device. It's really that easy.

Control4 keypads make it easy to set a mood or save energy in one touch.

# Be comfortable, save energy

## Comfort

With Control4, it's easy to save energy and money without compromising comfort. During summer months, you can set the air-conditioning to switch off automatically when no one is home. Come winter, a smart fireplace switch can provide additional heating to keep the

house cozy even on the coldest of nights. And on the evenings you find yourself late at the office, just hop online to adjust your thermostat levels so the heat doesn't kick on until you're a little closer to home.

- Replace your current thermostat with a Control4® wireless thermostat to keep your home at a more energy-efficient temperature while you're out
- Program your shades to close during the brightest hours of the day
- Use dimmers, timers and occupancy sensors to reduce energy waste
- Automate your pool and sprinkler systems to conserve water

You can see your energy usage in kilowatts and dollars spent every month with real-time energy apps.

Control4 works with most smart locks and alarm systems to give you full control from any touch screen or wireless device.

# A little peace of mind goes a long way

## Security

If you want to know what's happening at home when you're away on business or just want to see who's at the front door, a little peace of mind can go a long way. That's why Control4 incorporates many of your home's systems, from lights to locks, to automatically make your home more secure, even when you're not there.

- Lock every door and arm the alarm, all with a single touch

- Check on the kids, whether your downstairs or downtown
- View the video feeds from your security webcams—any time, anywhere
- Receive a text alert when the Control4 system senses trouble at home, including water leaks
- Assign temporary security codes for deliveries and service workers
- Let yourself in when you forget your keys

24/7 home monitoring and control from your favorite mobile device: Control4 keeps you in-the-know with email or text alerts based on actions at home.

# Smart products, smart home

## Interfaces

A variety of intuitive Control4 interfaces let you control your lights, temperature, movies, music and much more. Or you can turn your iPad, iPhone, Android tablet, smartphone or PC into a Control4 interface with the MyHome app.

## Controllers

Controllers are the central hub of every Control4 system. Each model gives you powerful control over your entire home and enables you to build your dream home-control system over time.

## Lighting

Control4 dimmers and switches easily replace existing light switches, or plug into outlets to offer complete control of your lights and electronic equipment without construction hassles.

## A/V

From audio switches to amps, speakers to media players, Control4 offers multi-room music and video products that make it easy to enjoy your favorite entertainment from anywhere in your home.

# Smart products, smart home

## Climate

Advanced temperature control is a simple and affordable addition to any home with Control4. By automating systems to conserve energy, you can control your energy costs—when you're home or away.

## Security

Control4 works with the best brands in the security business to add enhanced security and convenience to any Control4 system with locks that install in minutes, and are easily managed from any home or internet connection.

## Software

Control4 makes it easy to add smarts to your system any time. Check your IP cameras from work or get text alerts when your children get home. And you can get the whole house talking with intercom functionality.

## MyHome™ app

Turn your iPad, iPhone, Android tablet,\* smartphone or PC into a control interface for your house with this easy-to-use app. MyHome makes it easy to control just about anything in your house from virtually anywhere.
